The DIRIS Q800 is a multifunctional network analyser for all energy efficiency projects. It helps to actively ensure the electrical system runs continuously and at optimised rates. As such, it can:

- Improve the efficiency of the installation.
- Reduce production losses.
- Optimise operating costs.
- Reduce maintenance costs.

To achieve all these, the DIRIS Q800 performs the following functions:

- Measure electrical quantities and states (auxiliary contacts).
- Energy quality analysis according to class A IEC 61000-4-30:2015 Ed.3.
- Measure differential current.
- GPS synchronisation.
- Send an email in the event of an alarm.
