Safety enclosures

Normal atmospheres

polyester enclosures from 50 to 1600 A

coff_219_a_2_cat

Polyester enclosure with front operation handle

coff_163_a_3_cat

Polyester enclosure with side operation handle

Function

Safety enclosures equipped with SOCOMEC switches provide emergency breaking, breaking for mechanical maintenance and safety isolation in the vicinity of any low voltage final circuit.

Advantages

Safety of operations

- Visible contacts and positive break indication with the possibility to add a mechanical indicator.
- Double locked door when the switch is in the OFF position.
- Triple locking of the handle in the OFF position.

Inductive load breaking (AC23)

Safety enclosures are designed for use with inductive loads and are able to make and break on load (AC23).

Robust design

Products have been designed for severe industrial conditions with chemical, pollution or atmospheric corrosion risks
(Polyester enclosure: good resistance to chemicals, self-extinguishable at 960°C, etc.)

The solution for

- Steel works
- Cement works
- Automotive
- Mining industries
- Food processing
- Chemical industry

Strong points

- Safety of operations
- Inductive load breaking (AC23)
- Robust design
- Easy implementation

Conformity to standards

- IEC 60364
- IEC 60947-3
- IEC 60204-1
- IEC 61439-2

Specific requests

- SOCOMEC can offer customised solutions to meet your specific requirements. Please contact your Socomec office for further information.

General characteristics

Breaking device

All polyester safety enclosures are equipped with SIDER load break switches and visible, reliable indication of the contacts open position. They make and break under load conditions and provide safety isolation for any low voltage circuit.

Enclosure

Enclosures are made of glass fibre reinforced polyester and are of the following types:

- COMBIESTER from 50 to 500 A (RAL7035)
- MINIPOL from 630 to 800 A (RAL7035)

Covers on COMBIESTER enclosures are hinged and equipped with a screw locking system. Doors on MINIPOL enclosures can be locked using a 3 mm double bar key.

These enclosures have good resistance to chemical agents and are self-extinguishing at 960 °C.

These enclosures provide a protection degree of IP55. Wall mounting is achieved using 4 fixing lugs, supplied loose.

Visible breaking

The contacts are visible through:

- The transparent cover of COMBIESTER enclosures.
- A door-mounted triplex glass window on MINIPOL enclosures. This enables the operator to confirm the position of the contacts either during a preventative check or before an operation.

Double locking

This function is achieved through a simple and robust mechanism using an extension shaft. Activation with the door open remains possible by authorised personnel.

Operating handle

Polyester safety enclosures are available with front or side operation handles. The handle is red and made of an insulating material (emergency breaking). The handle can be locked in the OFF position using three padlocks.

Connection

Polyester safety enclosures are available in two versions:

- TB version (top entry and bottom cable exit)
- BB version (bottom cable entry/exit). Connection is achieved by running cables to the top for 50 A and 80 A ratings. For higher ratings, the top set of terminals are brought down to the bottom of the enclosure with copper bars for easy connection of the incoming cables.

Miscellaneous

- An earthing bar for connection is available in the enclosure.
- Protection screen for live parts.

(1) For the mechanical indicator option, replace the second digit of the enclosure reference number with the letter V. For example: 3V15 3012.

(2) Stainless steel enclosures, specific locking systems, terminal pre-wired/non pre-wired control auxiliary contacts, ventilation and humidity evacuation systems or cable glands are available upon request. Please consult us.

Safety enclosures

Normal atmospheres

polyester enclosures from 50 to 1600 A

Accessories

Auxiliary contacts

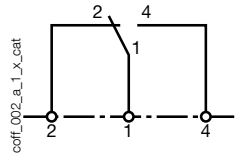
Use

For pre-breaking and signalling of positions 0 and I of the load break switch.

Mounting

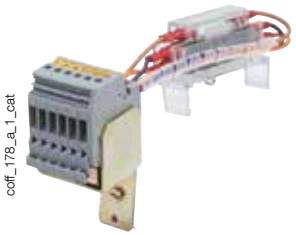
- On the double locking system.
- Possibility of factory mounting on enclosure (please provide enclosure reference when ordering).

1st NO / NC AC for pre-break

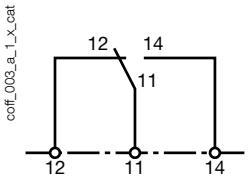


Contact(s)	AC	Factory fitted AC	Factory fitted low level auxiliary
1st NO/NC changeover AC front operation ≥ 125 A	2799 **0001**	2799 **1001**(1)	
2nd NO/NC changeover AC front operation ≥ 125 A	2799 **0002**	2799 **1002**(1)	
2 NO/NC changeover AC side operation	2999 **0012**	2999 **1012**	
2 NO/NC changeover AC wired side operation	3290 **6002**	3290 **6102** (1)	3290 **6012**(1)

(1) Please provide the reference number of the enclosure to be equipped.



2nd NO / NC AC for pre-break



Key handle interlocking system

Use

Kit allowing a RONIS EL11AP or Serv Trayvou XOP10 lock to be fitted for a SIDER 50 to 1600 A, with side operation within a steel or polyester enclosure.

Type	Locking in position 0	
	Reference	Factory option Reference
Locking using RONIS EL 11AP lock (not included)	3290 **7005**	3290 **7006**(1)
Locking using XOP10 lock (not included)	3290 **7015**	
Lock RONISEL11AP	4409 **8511**	
Serv Trayvou XOP10 lock	4409 **8601**	

(1) Please provide the reference number of the enclosure to be equipped.
