Stair type support

The solution for

- > Electrical distribution

Conformity with standards

- > IEC 61439-1
- > IEC 60865-1

Approvals and certifications ⁽¹⁾

- > ASEFA/LCIE

(1) Product part numbers on request.

Function

SOCOMEK **insulating busbar supports** enable the fixing and holding in place of copper or aluminium busbars or busbar systems during a short-circuit.

Characteristics

Insulators

- Polyester without halogen.
- UL94 VO self-extinguishing.
- Colour red RAL 3002.
- Operating temperature from -40 °C to +130 °C.
- Deformation under load temperature (ASTM D643): > 200°C.
- Dielectric constant (ASTM D150): 4/5.
- Arc resistance (ASTM D495): > 180 s.
- Water absorption (ASTM D570): < 0.3%.

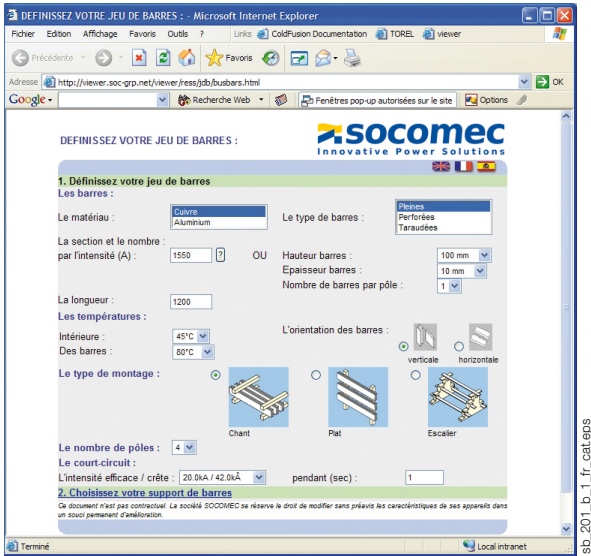

Busbar supports

- High dielectric strength.
- High mechanical resistance.
- Amagnetism of assembly parts.
- High resistance to damp heat (supplied "tropicalised").

Stair type supports

- Thermoplastic material.
- VO self-extinguishing.
- Insulating voltage: 1000 V.

Software tool for size selection

Strong points

- Easy to install and use
- Manages changes depending on environmental conditions

Function

Mechanical System is a multi-language software used for sizing busbar systems. It defines the configuration of the busbar system, including bar section and distance between supports, according to the required electrical characteristics of the panel in compliance with standard IEC 61439-1.

Advantages

Easy to install and use

The Mechanical System software is available for download from www.socomec.com. Once installed, the software can be used offline. It runs on Windows.

Manages changes depending on environmental conditions

Mechanical System allows you to perfectly adapt the copper section according to the environmental conditions of your panel and installation.

SB C 30

SB C 15

The solution for

- > Electrical distribution

Conformity with standards

- > IEC 61439-1
- > IEC 60865-1

Strong points

- > Insulating materials
- > Durability
- > Easy to use
- > Extensive range

Function

With SOCOMEC's insulating **bar supports** you can:

- mount and attach the busbars inside the electrical panel,
- cope with the forces experienced by the busbars during a short circuit.

Advantages

Insulating materials

- Our range of SB C edgewise mounting bar supports is made using thermoplastic. This very resistant material (reinforced fibreglass) is insulating so there are no risks in terms of clearance and creepage distances.

Durability

- Most bar supports have an M8 screw connection which provides outstanding robustness to the entire busbar structure.

Easy to use

- Only one type of spacer kit is required for the whole range of edgewise mounting busbar supports (SB C) with fixed interphase.

Extensive range

- Our range of bar supports allows you to assemble busbars with up to 120 kA of short-circuit current.

Selection guide

Edgewise mounting

- Busbar supports with **fixed interphase**

What you need to know

Bars joined by reversing a support
Compatible with SB C 10 and SB C 20

sb_045_b_1_x_cat.eps

Respecting the maximum distance between two supports ensures that the busbar supports are able to withstand the given short circuit current values. At these limits, distortion of the copper bars may occur. These deformations are permitted by standard IEC 61439-1 so long as they adhere to the insulation distances.

Spacer kit for support

Use

The spacer kit comprises 2 threaded rods and 2 insulating spacers cut at the length of the bar height as well as 4 nuts.

Bar height (mm)	Available for order in multiples of	Reference
25	1	5020 2025
30		5020 2030

Accessories

Adjustable interfixed profiles

Use

Adjustable interfixed profiles allow you to install the busbar supports at a variable depth. For high-load busbars, we recommend the use of adjustable reinforced floating profiles.

Type of busbar support	For depth Min./max. (mm)	Pack qty	Reference
SB C 10 2 x 5 / 1 x 10	575 / 675	1	5024 9050

SB C 15			5024 9052
SB C 20			5024 9054
SB C 30			

Adjustable reinforced floating profiles

Use

With adjustable reinforced floating profiles, you can install busbar supports in varying depths in the case of high-load busbars (from 100 kg/ml).

Type of busbar support	For depth Min./max. (mm)	Available for order in multiples of	Reference
SB C 15	575 / 775	1	5024 9053
SB C 20			5024 9055
SB C 30			

Holding rod for SB C 15

Use

With the holding rods for SB C 15, you can install the support on a standard mounting profile in the case of high-load busbars (from 100 kg/ml).

Material: Stainless steel threaded rod.

Bar height (mm)	Available for order in multiples of	Reference

SBC 30	1 to 3 x 10	3 / 4		5024 9033

Installation corner piece

Use

Allows the holding heel to be placed on a support.

For cabinet Depth (mm)	To be ordered in multiples of	Reference
Min. 400	1	5024 9000
Min. 600	1	5024 9001

Fast connection of flexible bar or cables

Use

- Allows you to connect flexible bars or cables to busbars without having to drill the bars.
- Connect on 2x 10 mm-thick bars placed side by side, 10 mm apart.
- For lug or flexible bar widths greater than 40 mm, use 2 connection accessories.
- Tightening with M10 screw, tightening torque 45Nm.
- For the connection, you will need: 1 tightening head nut and 1 screw adapted to the height of the bars.

Type	Bar (mm)	Available for order in multiples of	Reference
M10 tightening head nut	All	12	5119 4423

Quick connection for busbars

Use

- Lock and connect busbars without drilling.
- Connect on 2x or 3x 10 mm-thick bars placed side by side.
- M10 screw tightening, 45 Nm torque. (to be ordered separately).

Current (A)	Number of bars / poles	Available for order in multiples of	Horizontal connection Reference	Vertical connection Reference

Busbar supports

Edgewise mounting with adjustable interphase

The solution for

- > Electrical distribution

Conformity with standards

- > IEC 61439-1
- > IEC 60865-1

Strong points

- > Insulating materials
- > Durability
- > Adaptability

Function

With SOCOMEC's insulating **bar supports** you can:

- mount and attach the busbars inside the electrical panel,
- cope with the forces experienced by the busbars during a short circuit.

Advantages

Insulating materials

Our range of SBC upright supports with adjustable interphase is made using thermoplastic. This very resistant material (reinforced fibreglass) is insulating so there are no risks in terms of clearance and creepage distances.

Amagnetism of assembly parts.

High resistance to damp heat (supplied "tropicalised").

Durability

Standard spacers are made of high-strength insulating material. If used in extreme conditions or for greater robustness, metal rod kits are available.

Adaptability

The studs are fixed onto profiles adapted to standard cabinet sizes.

Selection guide

Edgewise mounting

I_{cc} up to **80 kA**

SB C ER P

What you need to know

sb_021_b_1_x_cat.eps

Respecting the maximum distance between two supports ensures that the busbar supports are able to withstand the given short circuit current values. At these limits, distortion of the copper bars may occur. These deformations are permitted by standard IEC 61439-1 so long as they adhere to the insulation distances.

Busbar supports

Flat mounting with fixed interphase

The solution for

- › Electrical distribution

Conformity with standards

- › IEC 61439-1
- › IEC 60865-1

Strong points

- › Insulating materials
- › Durability
- › Adaptability

Function

With SOCOMEC's insulating **bar supports** you can:

- mount and attach the busbars inside the electrical panel,
- cope with the forces experienced by the busbars during a short circuit.

Advantages

Insulating materials

Our range of SB P flat bar supports with fixed interphase is made using thermoplastic. This very resistant material (reinforced fibreglass) is insulating so there are no risks in terms of clearance and creepage distances.

Durability

Most bar supports have an M8 screw connection which provides outstanding robustness to the entire busbar structure.

Adaptability

The distance between the bar support attachment points is compatible with all commercially available enclosures.

Selection guide

Flat mounting

What you need to know

sb_021_b_1_x_cat.eps

Adhering to the maximum distance between two supports ensures that the busbar supports are able to withstand the given short circuit current values. At these limits, distortion of the copper bars may occur. These deformations are permitted by standard IEC 61439-1 so long as they adhere to the insulation distances.

Function

With SOCOMEC's insulating **bar supports** you can:

- mount and attach the busbars inside the electrical panel,
- cope with the forces experienced by the busbars during a short circuit.

Advantages

Insulating materials

Our range of SB P flat busbar supports with fixed interphase is made from insulating materials. This material poses no risks in terms of clearance and creepage distances.

Durability

Most bar supports have an M8 screw connection which provides outstanding robustness to the entire busbar structure.

Adaptability

The distance between the bar support attachment points is compatible with all commercially available enclosures.

Selection guide

Flat mounting

What you need to know

sb_021_b_l_x_catsps

Adhering to the maximum distance between two supports ensures that the busbar supports are able to withstand the given short circuit current values. At these limits, distortion of the copper bars may occur. These deformations are permitted by standard IEC 61439-1 so long as they adhere to the insulation distances.

Busbar supports

Unipolar flat-mounted
