# Function

The Socomec MULTIS range is a three phase multifunction measurement device. It measures three phase voltages, current, power, frequency, PF, THD with max demand and Import / Export feature. In addition it also has RS485 communication port.

# Applications

• MULTIS Lm55 & Lm 56 are digital LV and HV three phase measurement device. They display the most important electrical values needed in an energy efficiency process.

## Advantages

- Made of sturdy polycarbonate housing.
- Resistant to high shock level and adapted for working in a high pollution environment.
- Suitable for 3 phase 3 wire or 3 phase 4 wire network types.
- Both CT as well as PT are programmable.
- A very comprehensive parameter profile for energy measurement and power monitoring, that includes phase angle for current and voltage.
- Active, reactive as well as apparent powers are displayed.
- RPM, run hrs, ON hrs and interrupt are indicated.
- Key demand parameters are measured, including current, KVA, KW with nominal as well as maximum values.

- Characterized by high overload withstand, password protection.
- With annunciation of -ve sign display for the active power in 2nd or 3rd quadrant.
- · Dedicated indication for phase rotation error and for the correct phase sequence.
- Versions for CI-1 as well as CI-0.5 class of accuracy.
- Power monitoring via THD on current and voltage.
